b. Breakdown by geographical areas

按地區分類

The gross amount of loans and advances to customers by geographical areas are classified according to the location of the counterparties after taking into account the transfer of risk. In general, risk transfer applies when a loan or advance is guaranteed by a party in a country which is different from that of the counterparty.

客戶貸款及放款之地區分類，是依照客戶所在之地區，已計及風險轉移後而劃定。在一般情況下，若貸款之擔保人所在地有異於該客戶，則風險轉移至擔保人之所在地區。

8 International claims
國際債權

International claims are classified by the types and the locations of the counterparties after taking into account the transfer of risk. In general, such transfer of risk refers to the reduction of the BPSA HK's exposure to a particular country by an effective transfer of credit risk to a different country with the use of credit risk mitigates which include guarantees, collateral and credit derivatives. The basis of the country and geographical segment classification is in accordance with the guidance notes from the Hong Kong Monetary Authority.

本行計及風險轉移後，根據交易對手的類別及所在地劃分國際債權。在一般情況下，風險轉移是指利用信貸風險紓緩工具，包括擔保、抵押和信貸衍生工具，把信貸風險有效轉移至其他國家，藉此把本行對某特定國家的風險減低。國家和地區的分類準則，乃按照香港金融管理局的指引。

13 Disclosure on Remuneration
薪酬制度的披露

Pursuant to Section 3 of Supervisory Policy Manual (CG-5) “Guideline on a sound remuneration system” issued by the Hong Kong Monetary Authority, BPSA HK complies with the requirements.

根據香港金融管理局頒布的金管局監管政策手冊 (CG-5) “穩健的薪酬制度指引”第3條，本行遵守其要求。

14 Liquidity Ratio
流動性比率

	30 Jun 2026 於二零二六年 六月三十日	30 Jun 2025 於二零二五年 六月三十日
Average liquidity maintenance ratio for 3 months period 三個月平均流動性維持比率	78.66%	104.80%

The average liquidity maintenance ratio (“LMR”) are calculated as the simple average of each calendar month’s average liquidity maintenance ratio, which is computed as required by the Hong Kong Monetary Authority for its regulatory purposes, and is in accordance with the Hong Kong Banking Ordinance.

平均流動性維持比率是每月平均流動性維持比率的簡單平均數，並根據香港金融管理局的規管要求及香港《銀行條例》計算。

15 Liquidity Risk Management
流動性風險管理

Liquidity risk is the risk that an authorised institution (“AI”) is unable to meet its cash flow obligations as they fall due. The AI engages in a prudent and forward-looking liquidity risk management process, which is integrated into the Group-wide risk management process. The primary goal is to ensure that the AI is able to meet all its obligations as they come due by maintaining sufficient liquidity, even in a severely stressed environment and taking into account all potential liquidity risks and outflows that could arise and which could affect the bank’s liquidity position. For that purpose, the AI conservatively projects potential outflows as well as the liquidity of its assets and considers potential liquidity generating measures as part of its contingency funding plan. The projections are incorporated into comprehensive liquidity stress test models which conservatively aggregate all liquidity risks.

流動性風險是指認可機構可能要承受其無法履行到期之義務的風險。認可機構需審慎地將其前瞻性的流動性風險管理流程融入整個集團的風險管理流程內。首要目標是要確保其認可機構即使在壓力嚴重的環境中也能夠維持足夠的流動性來履行其到期的所有義務，並考慮到所有潛在性和可能會出現並會影響其銀行的流動性風險。為此，相關認可機構會保守地預測其潛在的資金性流出及其資產的流動性，並將其視為其應急融資計劃的一部分。這些保守流動性風險預測會被納入綜合流動性壓力測試模型內。

15 Liquidity Risk Management (cont'd)
流動性風險管理 (續)

BPSA HK adheres to the Pictet Group Liquidity Management Policy and adopts Pictet Group's liquidity risk management practices and also considers and complies with the relevant liquidity risk regulations prescribed by the Hong Kong Monetary Authority ("HKMA").

本行會依照瑞士百達集團的流動性管理政策及實踐其流動性風險管理，亦會遵守由香港金融管理局（“金管局”）制定的流動性風險管理法規。

Banque Pictet & Cie SA ("BPSA") Head office Treasury division runs the liquidity and funding stress model and measures the exposures and adherence to limits. Such reporting is made to Asia Treasurer and in turns report to Asia ALCO on any significant deterioration on BPSA HK's liquidity position, breaches in limits identified, results of liquidity stress testing, updates and/or changes on BPSA HK's balance sheet management. BPSA HK also monitor a set of liquidity early warning indicators that serves to pre-empt potential evolving liquidity risk situation which may require BPSA HK to activate Contingency Funding Plan to address those situations.

瑞士百達銀行總公司司庫管理資金流動性、壓力模型、測量風險，並為限額把關。瑞士百達司庫須就瑞士百達多項事宜變差時，向亞洲財務主管及亞洲資產負債委員會報告，包括：本行流動資金性的狀況、違反額度、壓力測試結果，以及資產負債表管理之更新及更改。本行已設置一系列流動性預警指標，以監測及預防潛在不斷變化的流動性風險情況。如有需要本行會立刻啟動應急融資計劃應對這些情況。

Due to its limited size and complexity, all liquidity and funding flows of BPSA HK are essentially back-to-backed into BPSA. Exceptions may exist for local currencies which are placed directly with local banks.

因本行規模較小及複雜性不高，本行的資金流動及財權由瑞士百達銀行總公司掌握，惟與本地銀行直接結算本地貨幣一項除外。

Internal Stress Testing

內部壓力測試

BPSA HK's stress testing procedures adopt the BPSA's stress testing framework based on the following:
本行採用以下內容，並依照瑞士百達銀行總公司制定之框架，以實行壓力測試：

Short-term liquidity gap ("STLG")

短期流動性缺口

BPSA HK is managing its liquidity risk using the short-term liquidity gap model. The STLG builds on the contractual maturity profile of the balance sheet, which is then adjusted behaviourally to reflect a liquidity stress scenario with one-year horizon. Additionally, potential off-balance sheet, intraday liquidity and other requirements are modelled in a stressed environment. The model stimulates severe combined stressed liquidity outflows and puts them into relation to available liquid assets.

本行用短期流動性缺口模型來應對流動性風險。短期流動性缺口，就是以資產負債表的合約限期為基礎，然後再作調整，以求反映一年期限內的流動性壓力情況。此外，潛在的資產負債表、即日流動性和其他要求，均已涵蓋於壓力模型範圍內。壓力模型所計算之流動性，將其與可用之流動資產相聯繫。

Long-term liquidity gap (based on Net Stable Funding Ratio – NSFR)
 長期流動性缺口 (基於穩定資金淨額比率)

The long-term funding gap (“LTFG”) is a measure of the structural funding position. It puts available stable funding in relation to illiquid assets. The parameterization of the model is in line and a direct result of the short-term liquidity gap model, with the exception that it includes an additional stable funding requirement for client loans of 50% of sub-1 year maturity client loans that are being deemed illiquid, and 100% of longer than 1 year client loans being deemed illiquid. Otherwise, illiquid assets are defined as all funding requirements that remain beyond 12 months of the scenario. Stable funding is defined as all funding supply that remains beyond 12 months of the scenario.

長期資金缺口屬衡量結構性資金狀況的指標，可為非流動性資產提供穩定資金。該壓力模型的參數化準則，是根據短期流動性缺口模型的基礎下，額外加多 50% 一年內到期之客戶貸款及 100% 一年後到期之客戶貸款為非流動性資產。非流動資產會被視為需要超出 12 個月的資金。至於穩定的資金，就是資金供應超過 12 個月。

LTFG

長期資金缺口

As of 30 Jun 2026

Long-Term Funding Surplus	
長期資金盈餘	26,220
LTFG Ratio	
長期資金缺口比率	499%

Limit: >100% (alert set at 115%)

限額：> 100% (警報設定為 115%)

Notes to the Financial Statements (cont'd)
帳目附註 (續)

15 Liquidity Risk Management (cont'd)
流動性風險管理 (續)

The current limits are set on the STLG in the combined liquidity stress scenario and require a liquidity coverage ratio (available liquid assets after haircuts to net stressed outflows) of at least 115% in every time bucket out to 12 months. Also the net stable funding ratio (available stable funding to illiquid assets) in the LTFG (combined stress scenario) is required to be at least 100% at all times.

現時綜合性流動資金壓力限額，是依據短期流動性缺口而設定。該限定要求流動性覆蓋比率（折扣後的可用流動資產與淨現金流出的比率），12 個月內的每一個期限組別，都要至少達到 115%。此外，長期資金缺口（綜合壓力情況）的穩定資金淨額比率（可用穩定資金與非流動性資產的比率），任何情況下均須達至 100%或以上。

In addition, alert levels are triggered if the STLG ratio drops below 120% or the LTFG ratio drops below 115%, or if any of the ratios drop by more than 15% over the course of one month.

此外，倘若短期流動性缺口比率低於 120%或長期資金缺口比率低於 115%，或任何時段的比率在一個月內下跌逾 15%，均會觸碰警報。

Contingency Funding Plan (“CFP”)

應急融資計劃

The BPSA HK has in place a Contingency Funding Plan (“CFP”) that serves to describe the procedures that BPSA HK will undertake to address an impending or when encountering a liquidity crisis.

本行制定了應急融資計劃的程序，用於解決即將發生或已遇到的流動性危機時將會採取的程序。

The CFP describes the monitoring of a potential liquidity stress event via relevant early warning indicators, the triggering of the CFP, internal responsibilities of various stakeholders, escalation procedures and suite of liquidity generating / preservation actions that could be deployed to ensure that BPSA HK can function as an ongoing entity.

應急融資計劃描述了通過監控相關預早警報指標、觸發了應急融資計劃、各利益相關者的內部責任、升級程序時潛在之流動性壓力事件以及可用於確保瑞士百達能夠持續發揮作用的一套流動性流程 / 保存措施。

Asia Treasury systematically monitors the development of the daily liquidity position of BPSA HK. For that purpose, Treasury maintains a daily Early Warning Indicator (“EWI”) sheet which includes relevant movements on the balance sheet, as well as relevant Pictet and market wide liquidity stress indicators.

亞洲司庫監測本行日常流動資金狀況，井然有序，如監察每日預早警報指標報表時，亦留意資產負債表上的變動及相關市場流動性壓力指標。

The CFP contains a list of short-term measures which can be taken quickly to significantly improve the liquidity position of BPSA HK. Should a deterioration of BPSA HK specific or the market wide stress indicators and metrics be observable, appropriate action will be taken.

應急融資計劃包括一系列改善短期流動性狀況措施，以快捷彰顯成效。倘發現本行或市場上壓力指標未如理想，瑞士百達將採取適當行動
